

Smart Homeowners, 62 and Older, are Using A
HOME EQUITY CONVERSION MORTGAGE LINE OF CREDIT
 as an excellent alternative to HELOCs

Home Equity Conversion Mortgages can be used for virtually anything, but are especially favorable when compared to Home Equity Lines of Credit!

- Age in place
- Update home for handicap accessibility
- Improve monthly cashflow
- Create a non-cancellable line of credit*
- Protect your investment portfolio and hedge against home devaluation in a down market

HECMs were created specifically for senior home owners, 62 years and older, who want to convert part of their home's equity into loan proceeds. Learn more about why HECMs are becoming a popular option to supplement retirement, to purchase a new home without monthly payments and, now, one of the most important financial planning tools in a senior's arsenal.
